

Cleaning Dentures with Soft Temporary Lining Homecare Instructions

1. Due to the fact that the temporary soft liner is adapting to your tissue, **DENTURES MUST BE WORN FOR THE NEXT 24 HOURS.**
2. Do not experiment with cleansers, as they may damage the lining material.
3. Use cotton balls to swab liner during the first several days. After this, the surface of the lining can be lightly brushed with a soft toothbrush.
4. Avoid hot foods and foods requiring heaving chewing for the first day. Warm food and light chewing will not harm the lining.
5. Avoid foods with seeds, as they can become embedded in the lining.
6. Keep denture in water when it is out of your mouth for any period of time. It should not become dry.

Please Note: Following these instructions will extend the life of the lining.
